Office Action Summary

Application No.

09/901,993

Applicant(s)

ESCANO ET AL.

Examiner

Javier G. Blanco

Art Unit

3738

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 10 July 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-20 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-20 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☒ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
- If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449) Paper No(s) 2.
- 4) ☐ Interview Summary (PTO-413) Paper No(s) _____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other:

DETAILED ACTION

Drawings

1. This application has been filed with informal drawings which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.
2. The drawings are objected to under 37 CFR 1.83(a) because they fail to show “**first end 36 of the cuff 12**” (see page 9, line 12), “**sutures 40**” (see page 9, line 19), and “**medical device 60**” (see page 10, line 17) as described in the specification. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

3. The disclosure is objected to because of the following informalities: on page 10, line 5, “see FIGS. 6 and 7” should be change to “see FIGS. 5 and 6”. Figure 7 does not show end cuff 50. Appropriate correction is required.

Claim Objections

4. Claim 1 is objected to because of the following informalities:
 - a. Claim needs an “a” before “structure” (see line 3)
 - b. Claim needs to remove the “+” at the end of line 3Appropriate correction is required.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claims 3 and 5 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claims 3 and 5 recite the limitation “**to engage both** an interior and an exterior segment of the body portion”. Said limitation was not disclose/described in the specification.

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

8. Claims 16 and 17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 16 recites the limitation “wherein the plurality of through holes”. Said unfinished claim limitation renders the claim vague and indefinite. Claim 17 recites the limitation “the plurality of holes” in line one. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

9. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

10. Claims 1-13 and 18-20 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Shull et al. (US 6,143,022). Shull et al. disclose a medical device comprising a body portion and two end cuffs. The medical device further comprises at least one shoe device being configured at one pair of converging struts (see Figures 2 and 7; see Abstract; see column 6, lines 31-43 and lines 52-60; column 7, lines 43-55; see entire document).

11. Claim 19 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Herweck et al. (US 6,010,529). Herweck et al. disclose a medical device having a body portion and a cuff attached to each end of the body portion (see Figures; see entire document).

12. Claim 20 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Schmitt (5,443,499). Schmitt discloses a medical device having a body portion and at least one shoe device being configured at one pair of converging struts (see Figure 8; column 8, lines 16-21; see entire document).

Claim Rejections - 35 USC § 103

13. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 3738

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

14. Claims 15-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shull et al. (US 6,143,022) in view of Schmitt (US 5,443,499) and Duffy et al. (US 6,086,611).

Shull et al. disclose the claimed invention except for the shoe portion not comprising a plurality of holes. However, Schmitt discloses gluing together converging struts (in fact creating a shoe device; see Figure 8) in order to maintain the structural integrity of the stent (see Figure 8; see column 8, lines 16-21; see also entire document). It is inherent that since the converging struts are glue together, each individual strut will be kept inside a hole. Therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to have used a shoe device with a plurality of holes, shown and inherent in Schmitt's teaching, with the medical device of Shull et al., in order to maintain the structural integrity of the stent.

Duffy et al. disclose using connectors 9 with through holes, in order to impart a high mechanical strength and maintain the structural integrity of the stent (see Figures 1A, 5A, and 5B; see column 2, lines 35-37; column 4, lines 54-67; column 5, lines 8-13 and lines 59-63; see also entire document). It would have been obvious to a person of ordinary skill in the art at the time the invention was made to have used a shoe device with through holes, as taught by Duffy et al., with the medical device of Shull et al., in order to impart a high mechanical strength and maintain the structural integrity of the stent.

15. Claim 14 is rejected under 35 U.S.C. 103(a) as being unpatentable over Shull et al. (US 6,143,022) in view of Schmitt et al. (US 5,503,636).

Shull et al. disclose the claimed invention except for not disclosing the shoe device as been made of plastic. However, Schmitt et al. teach a stent with converging struts enclosed or

Art Unit: 3738

jacketed in plastic in order to impart rubber elastic properties and help maintain the structural integrity of the stent (see Figures 3A and 4; see column 5, lines 18-26 and lines 32-39; see entire document). Therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to have used plastic, as taught by Schmitt et al., as Shull et al.'s shoe device material, in order to impart rubber elastic properties and help maintain the structural integrity of the stent.

Conclusion

16. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Lentz (US 5,522,881), Bynon et al. (US 5,667,523), Buirge et al. (US 5,693,085), Lombardi et al. (US 6,203,568), Magovern et al. (US 6,221,079), and Berg et al. (US 6,235,054).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Javier G. Blanco whose telephone number is 703-605-4259. The examiner can normally be reached on M-F (7:30 a.m.-4:00 p.m.).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Corrine McDermott can be reached on 703-308-2111. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9302 for regular communications and 703-872-9303 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0858.
